

Master Your Risk Landscape With C2, Your Compliance Solution

C2

The Ultimate Compliance Solution:

Here at C2, we recognise that risk and compliance involve juggling multiple assessment tools, all while trying to keep up with ever-changing industry standards. Our platform empowers organisations to streamline their compliance efforts, providing a centralised hub for assessing, managing, and achieving compliance excellence.

Regulatory

Ready to use assessments for legislative compliance and reporting.

Industry Standards

Prebuilt question sets and checklists based on international standards across multiple sectors.

Internal Control Review

Assess the internal control systems and adequacy of each business area and manage your project risk.

3rd Party Risk Management

Assess, identify, and mitigate risks within your supply chain and third-party network.

Build Your Own

Configure our existing assessments and checklists, or build your own to suit your individual requirements and needs.

Discover the C2 Risk Store: Efficiently Navigate, Assess and Manage Industry Standards

Imagine going into a store and finding everything you need all in one place... that's where the C2 'Risk Store' comes into play. Your destination for navigating the complex landscape of industry standards relevant to your organisation with ease and precision.

We specialise in risk assessments, offering an expansive library of frameworks specifically tailored to each regulatory standard. Our platform not only allows you to assess your current compliance posture but also automates the process, saving valuable time and ensuring you have solid evidence to present during audits.

Centralised Assessment Hub:

Library of assessments made for a wide range of industry standards

Single source which fosters aligned, consistent and effective compliance efforts

A single playbook for your entire organisation

Customisable Assessments:

You can create or tailor assessments specific to your needs and business objectives

Take control of your compliance journey

Implement and develop your risk management strategy

Streamlined Compliance:

Simplify compliance management by navigating regulatory landscapes and internal risks

Actionable insights provide a clear understanding of decision-making and risk mitigation

Proactive risk management

Information Security:

ISO/IEC 27001: Information Security Management System (ISMS) standard for protecting sensitive data.

Cyber Essentials: UK government-backed scheme for basic cybersecurity controls against common cyber threats.

PCI DSS: Security standard for secure handling of credit card payments.

Privacy:

GDPR: EU regulation for data protection and privacy.

DTAC: Data Transparency and Accountability Code for responsible data handling.

ESG (Environmental, Social and Governance):

ISO 14001 2015: Environmental Management System (EMS) standard for managing environmental impacts.

★★★ Quality Management:

ISO 9001: Quality Management System (QMS) standard for consistent product and service delivery.

Artificial Intelligence:

ISO 42001: Establishing, implementing, maintaining, and improving an organisation's AI management system.

Regulatory Compliance:

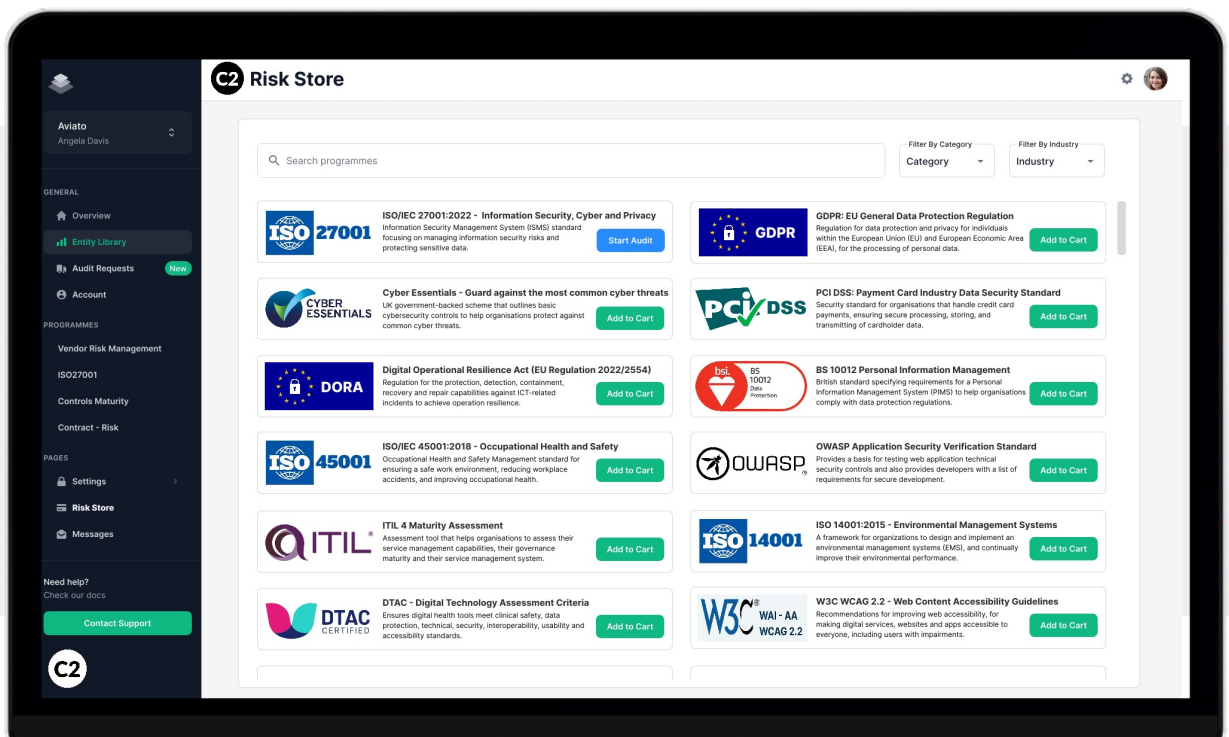

ISO 45001: Occupational Health and Safety Management System (OHSMS) standard for workplace safety.

DORA: Applicable based on IT infrastructure reliance and potential disruption impact.

We simplify your security and compliance program by providing policy templates and clear guidance to mitigate potential threats, helping you build a strong foundation based on industry best practices.

“C2 have simplified the process of our privacy operations and management, whilst increasing the responsiveness and accuracy of our programme. Their technology supports the business sponsors, procurement, and legal teams, as well as the project sponsors and any 3rd party technology providers themselves and assures our information is secure. With their collaborative approach it’s felt like we’ve had a partner standing with us shoulder to shoulder, making the integration of their managed services a positive experience across the business. Keep up the good work C2!”

Glen Hymers,
 Head of Data Privacy & Compliance and Information Assurance
 Cabinet Office, UK Government

1 Prepare

Organise all your auditable entities in one place.

2 Assess

Conduct your assessments according to standards and frameworks of your choice.

3 Manage

Ensure all audits are completed correctly with all evidence required.

4 Remediate

Address highlighted vulnerabilities, using automated remediation capabilities for seamless action and incident management.

5 Report

Export meaningful reports for different stakeholders such as executives, analysts, and reviewers.

ProAssure by C2: Elevating your Compliance Strategy

Expert-Managed Risk Solutions That Save Time and Reduce Costs

We're here to take the weight of risk off your shoulders.

Managing compliance assessments in-house requires significant resources, specialised knowledge, and a deep understanding of complex data and regulatory requirements. That's why our ProAssure managed service offering is designed to fully handle and administer the compliance process for you.

With ProAssure, our team of experts leverages our advanced platform to manage all aspects of the assessment, enabling you to concentrate on your core business activities without sacrificing risk management effectiveness. This approach is not only efficient but also nearly 80% more cost-effective than managing it internally.

Don't let compliance constrain your business
